Software Engineer with 2+ years building web and mobile platforms end to end. Backend in ASP.NET Core and Sitecore headless, plus Node.js and Express with MongoDB. Frontend in React.js, Next.js, TypeScript, and React Native. Work spans legacy migration, API design, and CI/CD delivery, much of it on large government platforms.

Technical Skills

Skills - Category	Skills - Worked On
Languages	C#, JavaScript, TypeScript, SQL, HTML5, CSS3
Frontend	React.js, Next.js, Redux, React Native, Material UI, Tailwind CSS
Backend	Node.js, Express.js, ASP.NET Core, ASP.NET MVC, Razor, Umbraco, Sitecore, REST APIs
Databases	MongoDB, Microsoft SQL Server
Cloud & DevOps	Microsoft Azure, Azure DevOps, GitHub Actions, CI/CD, Git, Vercel
Testing	Jest, Vitest

Professional Experience

Technyx Systems Karachi, Pakistan
Software Engineer January 2025 - Present

- Build government digital platforms end to end: one Sitecore instance serving a Next.js web front end and native Android and iOS clients.
- Develop Sitecore templates, renderings, and data templates, then expose that content to the front end through the Layout Service.
- Design and implement 10+ custom Umbraco document types and REST API controllers for structured, multi-language content.
- Migrated a legacy React v16 codebase to Next.js. Added SSR and file-based routing; pages load faster and index better.
- Built 20+ reusable, responsive UI components in React.js, Next.js, Material UI, and Bootstrap.
- Model schemas in SQL Server and MongoDB, with indexes tuned for the queries that actually run.
- Build REST APIs in Node.js and Express covering routing, validation, and error responses.
- Deploy to Azure App Service with CDN in front.
- Harden services with validation, centralised error handling, and structured logging.
- Ship through CI/CD on Azure DevOps and GitHub Actions, with peer review on every pull request.
- Run requirements analysis, sprint planning, and story grooming in an Agile/Scrum team.

Software Engineer Intern July 2024 - December 2024

- Worked across 2 live client projects on API integration, UI components, and peer code review.

Square Tech Karachi, Pakistan
Backend Developer Intern April 2024 - June 2024

- Built a REST API in Node.js and Express for a mobile event-management app, covering auth, data models, and route handlers.
- Modelled the MongoDB collections for events and bookings, with CRUD routes the mobile client consumed directly.

Selected Projects

Government Tourism & Destination Information Platform - Digital Platform December 2024 - Present
Sitecore, ASP.NET Core, React.js, Next.js, TypeScript, Redux, Node.js, Material UI

- Build and maintain the Sitecore backend that serves the Next.js web platform and the native Android (Kotlin) and iOS (Swift) apps from a single instance.
- Develop Sitecore templates, renderings, and data templates, and expose that content through the Layout Service.
- Migrated a legacy React v16 codebase to Next.js. Added SSR and API routes; pages load faster and index better.
- Rebuilt the UI and wired up 4+ REST endpoints, with validation and error handling on every call.
- Added crash handling across the app. Runtime crashes dropped about 5-6%.

Government Luxury Coastal Development Project - Digital Platform September 2026 - October 2026
Umbraco 17.5, ASP.NET MVC, Microsoft SQL Server, React Native

- Built the backend on Umbraco 17.5 and ASP.NET MVC with SQL Server, defining content models and controllers that serve both the web platform and a React Native mobile app.
- Developed the React Native mobile client against that backend, reusing API contracts for a consistent cross-platform experience.

Government Family Affairs Digital Services Portal - Digital Platform July 2026 - October 2026
Umbraco 17, ASP.NET Core, Microsoft SQL Server, Microsoft Azure

- Built a headless CMS backend with 10+ custom Umbraco document types for structured, multi-language government content.
- Developed custom REST API controllers for external integrations and content delivery, deployed to Azure App Service with CDN.

AusafJ Portfolio - Personal Site & Content CLI August 2026 - Present
Next.js (App Router), TypeScript, MongoDB Atlas, Mongoose, Vitest, Vercel

- Implemented Mongoose models and serverless API routes on MongoDB Atlas, with rate limiting and dynamic OG image generation.
- Maintain a green quality gate on every commit: ESLint, Prettier, TypeScript typecheck, Vitest tests, and a production build.

Event Management REST API April 2024 - June 2024
Node.js, Express.js, MongoDB, JWT Authentication

- Designed and implemented the REST API powering a mobile event-management app: authentication, events, bookings, and CRUD route handlers.

Education

- B.S. Computer Science - University of Karachi, Karachi, Pakistan | February 2022 - December 2025
- Intermediate (Pre-Engineering) - Govt. DJ Science College, Karachi, Pakistan | September 2019 - August 2021

Certifications

- JavaScript (Intermediate) Certification - HackerRank | August 2026
- Claude Code in Action - Anthropic | April 2026
- Claude 101 - Anthropic | August 2026
- Certified Web & Mobile Application Developer - Saylani Mass IT Training (SMIT) | November 2023
