PROFESSIONAL SUMMARY

Software Engineer with 2+ years delivering production web and mobile applications end to end. Backend on ASP.NET Core, ASP.NET MVC, and Sitecore and Umbraco headless CMS with Microsoft SQL Server and Microsoft Azure; frontend in React.js, Next.js, TypeScript, Redux, and React Native. Work spans REST API controller design, content modelling, legacy migration, and CI/CD delivery, much of it on government platforms.

TECHNICAL SKILLS

Languages: C#, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Backend - .NET: ASP.NET Core, ASP.NET MVC, Razor Views, Razor Pages, REST APIs
CMS: Sitecore, Sitecore Layout Service, Umbraco 17.5
Frontend: React.js, Next.js, Redux, React Native, Material UI, Tailwind CSS, SCSS
Databases: Microsoft SQL Server, MongoDB
Cloud & DevOps: Microsoft Azure (App Service, CDN), Azure DevOps, GitHub Actions, CI/CD, Vercel
Also works with: Node.js, Express.js, REST APIs, Mongoose ODM
Tools: Git, Postman, Visual Studio, Jest, Vitest
Practices: Responsive Design, Performance Optimization

PROFESSIONAL EXPERIENCE

Technyx Systems | Karachi, Pakistan

Software Engineer | January 2025 - Present

- Deliver full-stack features end to end on government digital platforms: ASP.NET Core and Sitecore services on SQL Server, plus the React.js, Next.js, and React Native clients that consume them.
- Develop Sitecore templates, renderings, and data templates, then expose that content to the front end through the Layout Service.
- Design and implement 10+ custom Umbraco document types and REST API controllers for structured, multi-language content and third-party integrations.
- Deploy and operate applications on Azure App Service with CDN in front.
- Migrated a legacy React v16 codebase to Next.js with server-side rendering (SSR). Pages load faster and index better, with no disruption to the live stack.
- Built and maintain 20+ reusable, responsive UI components in React.js, Next.js, Material UI, and Bootstrap.
- Developed a React Native mobile client against a shared .NET backend, reusing API contracts so web and mobile stay consistent.
- Ship through CI/CD on Azure DevOps and GitHub Actions, with peer review on every pull request.
- Run requirements analysis, sprint planning, and story grooming in an Agile/Scrum team.

Software Engineer Intern | July 2024 - December 2024

- Worked across 2 live client projects on API integration, UI components, and peer code review.

Square Tech | Karachi, Pakistan

Backend Developer Intern | April 2024 - June 2024

- Built a REST API in Node.js and Express.js for a mobile event-management app, covering authentication, data models, and route handlers.
- Modelled the MongoDB collections for events and bookings, with CRUD routes the mobile client consumed directly.

KEY PROJECTS

Government Tourism & Destination Information Platform - Digital Platform
Sitecore, ASP.NET Core, React.js, Next.js, TypeScript, Redux, Material UI, REST APIs | December 2024 - Present

- Build and maintain the Sitecore backend that serves the Next.js web platform and the native Android (Kotlin) and iOS (Swift) apps from a single instance.
- Develop Sitecore templates, renderings, and data templates, and expose that content through the Layout Service.
- Migrated a legacy React v16 codebase to Next.js. Pages load faster and index better, with no disruption to the production stack.
- Rebuilt the UI and wired up 4+ REST endpoints, with validation and error handling on every call.
- Added crash handling across the app. Runtime crashes dropped about 5-6%.

Government Luxury Coastal Development Project - Digital Platform
Umbraco 17.5, ASP.NET MVC, Microsoft SQL Server, React Native | September 2026 - October 2026

- Built the backend on Umbraco 17.5 and ASP.NET MVC with SQL Server, defining the content models and controllers that serve both the web platform and a React Native app.
- Exposed shared REST endpoints so web and mobile consume one data layer.

Government Family Affairs Digital Services Portal - Digital Platform
Umbraco 17, ASP.NET Core, Microsoft SQL Server, Microsoft Azure | July 2026 - October 2026

- Built a headless CMS backend with 10+ custom Umbraco document types for structured, multi-language government content.
- Developed custom REST API controllers for external integrations and content delivery.
- Deployed to Azure App Service with CDN in front.

AusafJ Portfolio - Personal Site & Content CLI
Next.js (App Router), TypeScript, MongoDB Atlas, Vitest, Vercel | August 2026 - Present

- Building a statically rendered Next.js portfolio with a custom content CLI. Every commit passes the same gate: ESLint, Prettier, typecheck, Vitest, production build.

EDUCATION

- B.S. Computer Science - University of Karachi, Karachi, Pakistan | February 2022 - December 2025
- Intermediate (Pre-Engineering) - Govt. DJ Science College, Karachi, Pakistan | September 2019 - August 2021

CERTIFICATIONS

- JavaScript (Intermediate) Certification - HackerRank | August 2026
- Claude Code in Action - Anthropic | April 2026
- Claude 101 - Anthropic | August 2026
- Certified Web & Mobile Application Developer - Saylani Mass IT Training (SMIT) | November 2023
